elfminiatures@hotmail.co.uk

Open units are available in three heights and three depths. Tall units, available in standard and shallow depths, can be used as stand-alone bookcases, desk hutches, sideboard upper sections, and various other multi-functional storage combinations. They can also be combined with standard and/or short units to create fitted bedroom units. All are available in 1½", 2" and 3" widths. They can also be completed with glass-fronted doors (NOTE, the doors are not hinged but can be removed and replaced at will so that you can display your favourite miniatures. For wider combinations, simply join more units together.

The medium height units are available in deep, standard and shallow versions. The deep one can be used to create a desk or base for multi-functional units. The standard one can be used in conjunction with closed units to give added display space. It can also be be used to create bathroom storage and combined with other units for fitted bedrooms. Tall units have three shelves, while standard and short units have one shelf (these may be left out if you wish when you design your layout.)

The short units can be used to create media storage, as bases for TV tables and coffee tables, and combined with other units to create a wide variety of multi-functional storage and display solutions.

Wardrobes are available in two heights and are deep units. They can be combined with standard depth units of varying heights, as shown on the right, to create various bedroom storage combinations. (see also COMBOs)

The cost of a simple base is included with the cost of the units. If you would prefer a base with legs, or plinths, these are available separately.

The basic single bed can be used alone or combined with open or closed short units to create imaginative cabin bed solutions for a child's or teenager's room (see COMBO's) There is also an optional mattress insert kit with a choice of covers

Media panels are available in wood or hi-gloss acrylic (this is like coloured glass). This is available in black or white with other colours on request. The standard panels are 4" tall, so can be combined with tall open units. They are grooved on one side, plain on the reverse. The panels are available in widths 4" to 8". There are also narrow panels 1 1/2" or 2" wide in two heights, which are available with a range of optional shelves. The taller unit can be used with a standard panel topped by a horizontal wall mounted unit to create a contemporary media unit (see photo on front cover).

HOW TO COMBINE UNITS

The units can be combined in an almost infinite number of ways, and here we suggest some popular options.

For a simple sideboard, combine different doors/drawers and add these to a basic medium standard depth closed unit. Alternatively, combine with shallow open shelves above to create a more substantial unit, adding two glass-fronted doors to create a stunning piece for your dining room! We used 1 1/2" units for the side sections and 2" units in the centre.

Open shelves can be used on their own or joined together to create simple bookshelves. We've used two tall shallow units on the left, adding only two shelves to each (three are included in the price). The other unit, below left, uses two medium height units to create a lower unit. However, these open shelves can be added to bases to create a variety of multi-functional storage units. We've added short standard depth bases in a combination of open and closed units to create the unit in the photo on the right.

In a different combination, we've replaced the middle shelves with a media panel and added a wide-screen TV, using a continuous top to enclose it.

To create a simple desk, choose two deep medium bases and leave a space between them, adding a top to complete it. Perfect for the small home office!

If you would like to create something with more storage space and room for books and other mini treasures, add open shelves above and you have the perfect study desk for a teenager. And of course, you could paint it all in a bright colour to make it stand out.

For a child's room, use a shallow bookcase to support one end of the desk, with a medium base at the other.

Closed base units also make great dressing tables. We have two versions of the drawer fronts for medium height units – two shallow and one deep for desk drawers, but graded drawers for bedrooms. Combine two chests with a top and add a mirror for a classic unit.

As an alternative to the knee hole dressing table, create a contemporary feel with a wide 3" chest between two wardrobes – here we've used the shorter ones and a chrome mirror in the space. The deep top disguises the fact that the chest is shallower than the wardrobes.

Wardrobes can also be combined with other units to create bedroom storage. We've used the same two short wardrobes with a tall standard depth open shelf and a closed medium base, adding a door to this, thus creating space for miniature shoes and bags.

Wardrobe units can also be used to create a corner layout, Here two wardrobes have been combined with open shelving and medium units to build a combination that offers plenty of space for display, with the chest creating different levels.

Tall wardrobes can also be combined with the spanning units to create a wall to wall fitted bedroom. In this combination we've added two short units with drawers as bedside tables and used them with an ELF 1-2-3 bed base and posable duvet.

For a child's room, why not create a cabin bed. Using the single EAZY LIVING bed base, add a combination of short units, some with drawers, others open, and finish with a plinth. Add the EAZY LIVING optional "tucked in" bedding (available in a wide choice of fabrics – or use your own) and you have the perfect solution! Paint it white with drawers in contrasting colours for a really bright contemporary feel.

You can leave your units in the beautiful light wood finish, waxing them for a perfect finish (full instructions for different finishes are given in the instruction manual) or paint them in the colour of your choice. Alternatively, you can use one of the hi-gloss finishes available from ELF. We've created a stunning media unit using an 8" long standard depth short base with drawer fronts, and adding a 6" standard media panel in white acrylic combined with a narrow tall version with optional shelves in walnut and a horizontal wall unit. Both base and wall units have been finished in white hi-gloss. In the photo on the left we have used the standard base (included in the price of the unit), but you might like to add a base with steel legs that lifts the unit a little higher and gives it a real "wow" factor. The walnut of the shelves matches the walnut frame of the sofa with its luxurious real leather cover in brilliant white.

Sometimes you may only have a relatively small space, but you can still create stylish furniture from the EAZY LIVING range.

Create a simple TV table with a couple of short units, including an open one for the DVD player.

Complete your sitting room with a stylish coffee table. Two short open units back to back provide space for magazines and the coffee and biscuits! Add a base with legs for a really smart look.

If you have a longer sofa, why not use two units and a longer top leaving a space between them. In both cases we've used standard depth units to give space for journals and magazines.

Complete your sitting room with a stylish coffee table. Two short open units back to back provide space for magazines and the coffee and biscuits! Add a base with legs for a really smart look.

HOW TO ORDER EAZY LIVING KITS

We offer a wide choice of EAZY LIVING COMBO units, and these come with all the pieces you will need to create the units shown. However, you can also create your own designs and below we offer a few hints.

Remember that units come WITHOUT tops so you will need to add these. Continuous tops come in three lengths, 6", 12" and 18". Add up the width of units you wish to cover, and add $\frac{1}{4}$ " (6mm) for an overlap at either side (you may of course wish to have a top extend further, for example in the case of a corner wardrobe where you will need an extra 2") and then order the next size up. So if you need a top $7\frac{1}{2}$ " long, order a 12" one. Where you have deeper base units than upper units you will need to order two tops, one for the base, the other for the upper units. For instance in this sideboard we have used a 5" standard depth base, with corresponding tall shallow open shelf units. We therefore need a standard top 6" long for the base section, and a shallow 6" top for the upper units.

If you have a space between units, but wish to have a continuous top, then add $\frac{1}{4}$ " plus the length of the gap to the length of the units. The unit below requires a standard top 12" long for the base (the unit is 7" altogether) and a shallow 12" top for the upper units (made up of two $1\frac{1}{2}$ " units, and a 4" space for the media panel which add up to 7").

All units come with an appropriate base strip. If you order two 2" units, a 3" unit and a 5" unit all of the same depth, we will send you a base 12" long. If your units will have a space between them, you will be able to cut the base to fit. This base lifts the unit from the floor to enhance the overall look of the pieces)

Instead of standard bases, you may wish to add plinths to your units. These are $\frac{1}{4}$ " (6mm) high. To calculate how much to order, add together the total width of the units to which you wish to add plinths, and then add up the number of side sections (the pieces that run from back to front) you will need. For instance, in the sideboard above you need two side sections. However, for a desk or dressing table with a knee hole, you would need four side sections. Allow $1\frac{1}{2}$ " per side section for deep units, 1" for standard and $\frac{3}{4}$ " for shallow. So, for the sideboard you would need 2×1 " plus the width of the unit, which is 5", making 7" in total. You would therefore order 12". For a shallow 2" wide bookcase you would need $2 \times \frac{3}{4}$ " plus 2" making $3\frac{1}{2}$ " so you would order 6".

Bases with legs are supplied in various widths and cannot subsequently be cut, so make sure you order the correct length. Units up to 6" have four legs, while longer units have additional legs in the centre.

Doors are available in two widths, $1\frac{1}{2}$ " and 2". All doors are $2\frac{1}{8}$ " high, except the long horizontal doors for media and spanning units (these however are supplied with the units so do not need to be ordered separately) and the tall glass-fronted doors, designed for use with the tall open units, which are 4" high (use two $1\frac{1}{2}$ " wide doors for a 3" wide unit). NOTE: these doors are NOT hinged but are designed to be held in place with gripwax, so that you can remove and replace them easily in order to access your favourite miniatures.

Drawers are available in three widths, $1\frac{1}{2}$ ", 2" and 3". The three-drawer combination for medium height units is available in two versions, one for desks with two shallow drawers and one deep drawer, the other with three graded drawers for dressing tables and other general storage units. Check that you have ordered the correct ones. The drawers for short units comprise two drawers of the same height.

For corner wardrobe combinations, remember to add the corner filler to your order and add 2" to the total length of continuous top you require. It is also possible to create corner combinations with other units but ONLY if they are all the same depth. You cannot currently create a corner unit if you have standard depth units at the bottom and shallow units above. (We hope to introduce a specially designed corner unit shortly). If you choose to create a corner combination using similar depth units, remember to order a corner filler.

We intend to add further units to the range over the next few months. These will include a high bunk bed and study bed for children's and teenage rooms.

Full details and prices of all units, including COMBOs, are listed on the website.

CONVERSION TABLE

The following is a approximate table of conversion for measurements. (In the brochure we use the symbol “ to indicate inch)

Inch	Actual mm	Approximate mm
1/16	1.5875	2
1/8	3.1750	3
3/16	4.7625	5
1/4	6.3500	6
5/16	7.9375	8
3/8	9.5250	10
7/16	11.1125	11
1/2	12.7000	13
9/16	14.2875	14
5/8	15.8750	16
11/16	17.4625	17
3/4	19.0500	19
13/16	20.6375	21
7/8	22.2250	22
15/16	23.8125	24
1	25.4	25
2	50.8	50
3	76.2	76
4	101.6	100
