

ELF REAL WOOD WORKTOPS

LIME WOOD

The best choice if you wish to tint your wood (above tinted with walnut dye), it can also be simply waxed as shown above right, or is ideal if you wish to create your own faux marble effect or any other paint effect.

LIGHTWOOD

Pale golden honey tones, perfect for wax polishing.

MAHOGANY

Reddish brown, fairly even colour, most suited to classic styles

WALNUT

Rich dark colour,

CHERRY

Used here for the cabinets, cherry often has a marked grain with a striped effect.

LIMED OAK

Natural oak has a slight greyish tinge, and is usually either tinted, or, as here, given a white "wash". Gives a very rustic feel.
